

Usher Crowd Gate

A **Valley Dairy Farm Automation** Product

Features:

- Option of electric or pneumatic positive drive
- Simultaneous propulsion on both sides for better tracking
- Automatic advancement in sync with parlor entrance gates
- Can be programmed to stop when pressure on cows reaches a preset limit
- Bell on electrically-driven gate signaling advancement (air drive makes exhaust noise during advancement)

Construction:

- Made of high quality components throughout to provide a high level of reliability
- Option of fixed gate panel, accordion air-lift gate panel, or swing-up air-lift gate panel
- Hot-dipped galvanized steel gate panel
- Heavy duty ball-bearing wheels
- Electric fencer on gate to train cows to respond to gate movement
- Time-tested, high-quality, over-track control cable

Controls:

- Gate advancement controls in parlor and on carriage
- Remote lift-gate controls in parlor
- Complete second set of controls in holding area
- Holding area controls are housed in NEMA 4x non-metallic enclosures to protect components
- Additional control boxes can be added
